

“What Codes Are In Effect?”

(Special Notice to Contractors, Designers, & Owners)

Washington State has recently adopted revised building code standards regulating the design, construction, use, alteration, addition, repair, installation of equipment and fixtures, and the maintenance of all buildings and structures within each City and County.

As of July 1, 2007 all construction projects are required to be designed and built in compliance with the following codes:

2006 International Building Code
(and the ICC/ANSI A117.1 - 2003 for accessibility)
2006 International Residential Code
2006 International Mechanical Code
2006 International Fuel Gas Code
2006 International Fire Code
2006 Uniform Plumbing Code
2006 Washington State Energy Code, and the
2006 WA State Ventilation & Indoor Air Quality Code
(Each code above as amended and adopted by
Washington State)

(Please contact the Building Services Division or the City website for specific Site Design Criteria or questions regarding these changes.)
